

## **To Whom May It Concern**

It is a true pleasure for me to write this letter of recommendation for Dani Nahleh, who was my student at the Lebanese International University in two courses: Artificial Intelligence and Operating System Lab.

Dani is a careful and creative thinker with an eye for details and a devotion to logic, that's what I constantly noticed from his pertinent questions during the class. Dani is a punctual person, he never missed a class and he always respecting assignments and projects deadlines. Having evaluated his work in courses' projects, I could clearly perceive that Dani have a real passion for computer science.

In class, Dani is calm and attentive but he will never miss showing his helpfully toward his classmates especially during lab sessions where he shares ideas and solutions to fix programming and technical errors.

However, Dani potentials and abilities were evinced by his scores where he was ranked first in Operating Systems Lab with an average of 96/100 and second in Artificial Intelligence with an average of 81/100.

And in conclusion, the better words those describe Dani are intelligent, serious and devoted. I believe that Dani has all qualities and motivations to success higher studies in computer science. I totally recommend Dani as a prospective student in master computer science. Please contact me if there is anything else I can do on his behalf.

Sincerely yours,

Mahmoud Haydar  
Assistant Professor  
Computer Science Department
